true to sound since nineteen sixty-five

MEMPHIS
CAR | MARINE | POWERSPORTS
20 TWENTY

Power Reference amplifiers feature a striking wraparound LED accent beam which sets off the sleek sexy look. An all new cast aluminum chassis improves heat dissipation allowing them to play louder longer. PR amplifiers are the workhorse of the Memphis line with power and reliability at their core.

PRXA700.5

Easy Access Magnetic Cover

Ultra-Bright LED Accent Strip

full range amps

PRXA700.5	5-CH 4 x 75(w) + 1 x 400 (w) @ 2Ω
PRXA300.4	4-CH 4 x 75(w) @ 2Ω
PRXA300.2	2-CH 2 x 150(w) @ 2Ω

mono amps

PRXA1500.1	1-CH 1 x 1500(w) @ 1Ω
PRXA1000.1	1-CH 1 x 1000(w) @ 1Ω
PRXA600.1	1-CH 1 x 600(w) @ 1Ω

features

- Diecast aluminum heatsink
- Hidden top mounted control panel
- 12dB/octave Butterworth crossovers
- 1Ω stable (MONO Amps)
- Signal sensing auto turn on
- Short circuit protection
- Remote bass knob
- Input select switch (4/5 channel models)

Street Reference amplifiers are the ultimate combination of performance, aggressive style and value. These powerhouses are capable of pushing the envelope without breaking the bank. Street Reference is the perfect choice for any entry to mid-level system. These amplifiers feature a sleek black aluminum textured finish with a brilliant LED accent.

VIV
SIXFIVE SERIES

Dual Layer Composite Fiber Cone

Folded Surround

7.5" Voice Coil

Dual Layer Precision Coil Winding

7.5" Shorting Ring

320 Oz Magnet

DVVC - Direct Vent Voice Coil Cooling

Dual Layer Composite Fiber Cone

Unique lightweight cone material is extremely rigid resulting in fast response time and the ability to handle great amounts of power.

Folded Surround

Our folded surround design allows for increased excursion without sacrificing effective cone surface area resulting in more output compared to traditional surround designs

7.5" Voice Coil

No other subwoofer on the market features a massive 7.5" voice coil. This unique design allows the VIV subwoofer to push the limits of sound quality while still handling immense amounts of power.

Dual Layer Precision Coil Windings

The larger diameter voice coil allows for the precise number of windings to be arranged in 2 layers versus 4. Dual layer coils have lower inductance and cool significantly faster than 4 layer coils. The result is a flatter frequency response and more distortion free output

7.5" Shorting Ring

The shorting ring absorbs eddy current which act as a counter force when the coil is moving through the magnet gap. Reducing this results in lower distortion.

320 Oz Magnet

This massive magnet was developed to work in harmony with the oversized voice coil to generate unprecedented levels of magnetic force producing low frequencies unrivaled by the competition with minimal distortion.

DVVC Direct Vent Voice Coil Cooling

A cooler voice coil is a more efficient voice coil. The DVVC cooling system positions the vents directly below the coil allowing heat to dissipate faster than traditional venting allowing the subwoofer to play louder, longer.

The VIV1422 14" subwoofer is capable of handling and absurd 2200w RMS power with an exceptionally flat frequency response. The VIV1422 is the best of both worlds, high power and amazing sound quality. The massive 7.5" dual layer voice coil combined with the DVVC (Direct Vent Voice Coil) cooling dissipates the heat generated at high power. The unique folded surround was engineered to allow extreme excursion without sacrificing effective surface area.

VIV1422

High Excursion Folded Surround

features

- Massive 7.5" voice coil
- 7.5" shorting ring for reduced distortion
- Dual layer VC for reduced inductance and linear frequency response
- Folded surround for increased excursion without sacrificing effective surface area
- DVVC Direct Vent Voice Coil Cooling
- Stitched V-Groove surround

sixfive series sub

VIV1422   14" 2Ω DVC 2200/4400w

MOJO6 Subwoofers have earned the respect of the audio industry through raw performance that makes bass heads smile. MOJO subwoofers were designed to handle extreme power and produce thunderous bass.

Memphis MB subwoofers feature a proprietary dual-impedance voice coil design and jumpers to configure the impedance of the woofer to a true 2Ω or 4Ω impedance without sacrificing output. This unique design allows systems to be scalable making upgrading from a single sub to a dual sub set up simple without the need to replace the subwoofer.

SELECTIVE IMPEDANCE TECHNOLOGY
2Ω or 4Ω in One Subwoofer

Terminal 1 // Amp Signal Terminal

Terminal 2 // Impedance Terminal

MB subwoofers features a proprietary dual impedance voice coil allowing you to select between 2Ω and 4Ω by using the included color coded jumpers. This technology allows you to add additional subs to your system by quickly reconfiguring your subs to achieve optimum impedance.

NEW 20 TWENTY

MB1244

features

Memphis tower speakers received a major upgrade as well as a few new members of the family. Compression horn tower speakers cast massive sound to the end of a wake and now feature a bold new grill design equipped with RGB LED standard in all sizes. Our new Coax tower speakers utilize a traditional tweeter for a more musical sound while the new powersport pods feature a compact design perfect for side-by-sides.

MXAMCAPP

CLASSIC CARS & HOT RODS　　　　**MARINE APPLICATIONS**　　　　**POWERSPORTS APPLICATIONS**

The Headless Unit

This innovative hideaway system gives you the complete experience of a head unit without the need to alter your vehicles dash. Much more than a simple Bluetooth controller, this is an entire head unit packed into a hideaway box. The MXAMCAPP features a built-in 50x4 amplifier, 5 source options, and front/rear/subwoofer RCA outputs allowing you to build your entire system directly off the unit. The hideaway box is controlled via the Memphis app allowing you to control your EQ, AM/FM presets, control RGB LEDs and more. The attached wired remote fits in standard knock out locations but is not required. This is the ultimate for powersports, marine, hot rod and classic car audio integration where you don't want to alter the appearance of your dash.

features

MXAMCAPP - Headless Unit
- 5 Source Options: AUX/BT/AM/FM/WB
- USB charging
- 50W x 4 built-in amplifier
- RGB LED control output
- Front/Rear/Subwoofer RCA output
- 5 Volt pre-amp output
- Conformal coated PCB IP66 Rated
- Wired remote fits standard rocker switch cutouts
- Wired remote buttons illuminate

APP CONTROLS The following:
- RGB setting
- Custom EQ settings
- Balance/Fade
- AM/FM Presets Controls
- Radio search settings
- Manual/Seek/Presets

MXA source units offer the perfect solution for all your entertainment needs. Our newest addition the MXAZ24MC features front, rear and subwoofer outputs with multi-zone control, video inputs and a multi band EQ allowing you to build the ultimate audio system for your boat or side-by-side. Up to 2 optional MXA1MCR remote controls can be added to this unit allowing you to control your audio system from multiple locations.

NEW 20 TWENTY

MXAZ24MC Multi-Zone W/ Sub Control

Take ultimate control of your audio system with the MXAZ24MC media center. The multi-zone control feature allows users to separately control cabin zone and tower zone speakers while also maintaining independent subwoofer level control. The large TFT LCD display offers crystal clear viewing and features a night mode for comfortable operation when the sun goes down. The uniit features a video input allowing backup cameras to be connected. You can easily stream music via Bluetooth, AUX or USB or tune into AM/FM radio.

Harley Davidson OEM direct fit replacement kits includes everything you need to upgrade 2014 + Harley Davidson Street Glide and 2015 + Road Glide audio systems. The marine grade speakers in this kit were engineered for high output to be heard over loud engine noise and at highway speeds. The included amplifiers feature mounting brackets were designed to fit into specific locations on your bike making installation effortless. The included wire harness counters the EQ from the factory head unit sending a flat signal into your amplifier allowing you to achieve superior audio performance from your sound system.

COMING SOON — MXA300.4 AMPLIFIER & BRACKET

MXA300.4

MXA14HDKIT

Precision designed amp bracket allows the powerful MXA300.4 amplifier to mount securely to your bike with no customization required.

COMING SOON — MXA62HD 6.5" SPEAKERS

3 GRILLES INCLUDED

ROAD GLIDE | STREET GLIDE | TOUR-PAK

High power handling MXA62HD Speakers were engineered to be heard over engine and road noise at highway speed and to fit directly into Harley OEM speaker locations.

COMING SOON *KITS AVAILABLE Q2 2020*

features

MXAZ24MC - Multi-Zone Media Center With Subwoofer Control

- Designed for 2014+ Street Glide® 2015" Road Glide® and Tour-Pak
- IP66 weather proof design
- Low profile proprietary film dome tweeter with neodymium magnet
- Tweeter features integrated wave guide for improved low mid-range output
- Carbon-Fiber reinforced polypropylene Cone
- Santoprene surround
- Santoprene front spider for weather resistance
- High power 35mm voice coil
- Neodymium ring magnet motor for maximum output
- High temperature glass reinforced polymer frame to resist corrosion
- Integrated 6dB crossover with high power mylar capacitor
- Grilles for Road Glide, Street Glide and rear Tour-Pack included

MXA14HDKIT — Includes brackets and wire harness

MXA300.4 Motorcycle Amplifier

MXA300.4 — 300 Watt 4-Channel Amplifier Mounts directly to amp plate in MXA14HDKIT

Purchase all 3 part numbers for a complete Harley installation Kit!

LL6SA

6-Channel Line Level Adapter

- Six inputs and outputs
- Signal sensing
- Remote turn on output
- 9.5v line level output
- Auto summing
- Remote level for Bass
- Aux input

LLD2A

2-Channel Line Level

- 9.5v line level output
- 100 Watts of speaker level input at 4Ω
- Signal sense turn on
- manual turn on function w/ output
- Wired remote level control Aux input

CX23

3-Way Crossover

- 3-way crossover
- Bandpass capable
- Includes wired remote level control
- 7v line level output
- Signal to noise ratio >110
- THD% 0.0005%
- Aux input

MEMBX

Bass Expander

- Digital Bass restoration processor
- Low level inputs
- Max 9.5v output
- Variable Q and Frequency control
- Remote bass control included

EQL7

7-Band Equalizer

- ½ Din 7 band pre-amp/Graphic EQ
- 8v out
- >96dB S/N ratio
- Aux input
- Blue LED backlight

ENGINEERED TO RESIST

POLRCA	Adapter works with Polaris OEM head unit

NEW 20 TWENTY

New Design - Black on Blue Thermal Foil
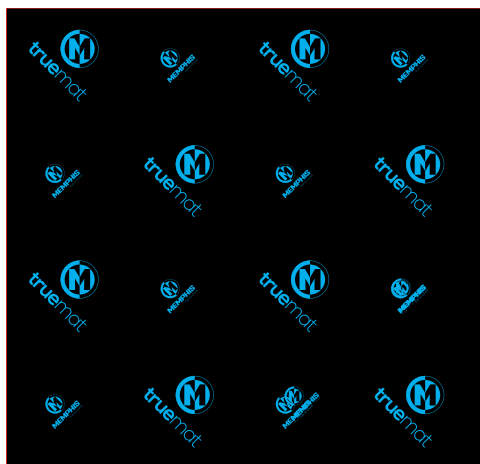

True Mat Sound Deadening

Maximize the potential of your audio system with Memphis True Mat

Part Number	Descriptions
TMLP	License plate - Frame & Mat
TMSK	Speaker Kit - Two 10 x 10 Sheets
TMVK	VersaKit - One 18 x 32 Sheet
TMBK	Bulk Kit - Ten 18 x 36 Sheets

True Mat Features

- Butyl based construction — Superior flexibility in any climate
- Reduces panel resonance for better sound by reducing road noise
- Industrial grade adhesive bonds to virtually any surface
- Metal shield increases durability and acts as a thermal barrier
- Dense 2mm pad for single layer application
